CELEBRATION OF SUCCESS

ANNOUNCEMENTS

Principal's Message

We have come to an end of another academic year. As we consolidate and reflect upon the year's happenings, we bring with us new learnings which make each year better than the previous one. We learnt a lot from 2020 and we were better prepared for 2021 even though the pandemic continued to disrupt our daily lives. Every end takes us to another new beginning. As we continue on our journey ahead next year, we bring with us many rich learning experiences that we have gone through in the past year. We are certainly ready to welcome another new beginning with our better selves. We encourage our students to continue to reflect, learn and grow. We also encourage them to embrace continuous learning and seek improvement. Every student will build on their prior knowledge and approach each new experience with more resilience and confidence.

The end of the academic year is also a time that we celebrate the milestones and achievements of our students. While celebrating their success, we want to acknowledge the effort that they have put in to be where they are today. The value for the term – perseverance, aptly placed in this term, is a reminder that success belongs to those who are willing to embrace opportunities, put in effort to try and have the determination to persevere and overcome challenges. At our annual Celebration of Success, we celebrate not only success, milestones and accomplishments of our students, but also the unique traits of each and every student.

As we conclude the academic year 2021, we would like to remind ourselves and our students to show gratitude and appreciation for those who have walked the journey with us. On this note, I would like to thank all partners, parents, teachers and staff of the school for your support and commitment to work together to support our students' learning. To all the students of NCPS, you have done well and we are proud of you. As you learn to adapt and appreciate, you have definitely emerged stronger. In NCPS, we always believe that Together is Better and we will continue to carry this belief around.

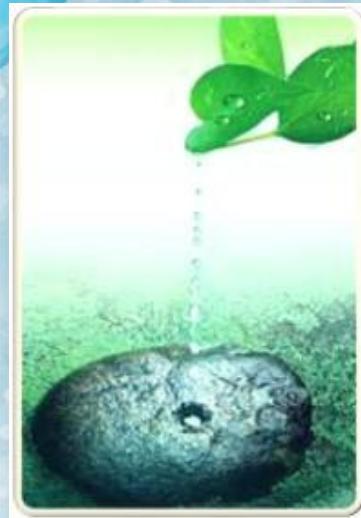

Every end opens up the pathway to another new beginning. We bid farewell to our Primary 6 graduands as they move on to a new phase of their learning journey. At the same time, we welcome a new batch of Primary 1 students and we look forward to nurture, grow and glow with them. Meanwhile, I wish everyone a happy holiday season with your family and friends.

Yours sincerely,
Mrs ONG-LOH JM
Principal

Values in Education

PERSEVERANCE

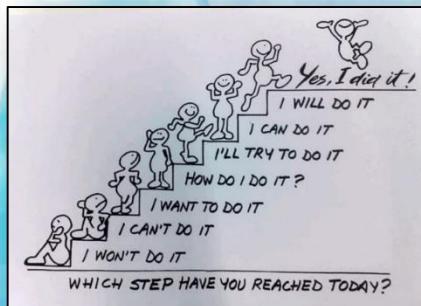

A river cuts through a rock not because of its power, but its persistence. This proverb illustrates a powerful imagery to show students the power of Perseverance.

At the beginning of Term 4, our Principal, Mrs Ong, engaged the students on the school value of Perseverance. She shared lessons from famous personalities such as Albert Einstein, Singapore's late first Prime Minister Lee Kuan Yew and Nelson Mandela. Linking Perseverance to the school's theme of *Adapt and Appreciate*, she also guided students to see that as they adapted to overcome challenges, they became stronger. She encouraged students to maintain positivity and continue to take small steps towards success.

As a follow-up activity, students reflected on the value of Perseverance in their Student Diaries and parents were asked to show their support by acknowledging what their child had written.

Reported by Mdm Elista Tan

HAPPY CHILDREN'S DAY

This year, the students had their inaugural celebration of Children's Day at home. It was truly a demonstration of our theme for the year, Adapt and Appreciate. Every class had their own special 2-hour celebration, filled with performances and thrills.

It was clear from the children's excited and cheerful expressions that they cherished the time they spent as a class on zoom, whether it was singing 'Semoga Bahagia' together or competing for the fastest fingers on Kahoot! To some, it even felt like an extended celebration as the teachers gave out presents the following week in school. It was indeed a memorable celebration for all.

Reported by Mrs Lee-Kok Lee Min

DEEPAVALI

Did you know that 'Deepa' means light and 'Avali' means row? Deepavali's literal meaning is a row of lights and it is also known as the Festival of Lights. This year, the celebrations kicked off through a video where the students learnt about the meaning of Deepavali. They also witnessed the lighting up of the oil lamp by Mrs Ong, accompanied by the other school leaders. They watched a play about the values of family and bonding during Deepavali. This was followed by an exciting quiz to end the assembly.

The lower primary students enjoyed colouring their greeting cards and the middle primary students did their own Kolam drawing. The upper primary students challenged themselves to create their own motifs on a card.

Reported by Ms Pooja

SCHOOL Events Spotlight

E-WASTE COLLECTION DRIVE

The school had organised the e-Waste Collection Drive from 12 October to 11 November this year to encourage students, parents and school staff to recycle their unwanted or spoilt electronic devices and appliances instead of throwing them into the waste bins. The students also learnt through a Student Learning Space (SLS) online learning package about the harmful effects of e-wastes on the environment, and how they can play their part to reduce e-wastes.

"I learnt that e-wastes actually contain useful metals which can be recycled. I deposited my parents' old handphone chargers in the e-waste bin."

Hafsa Begum, P2 Diligence

Reported by Mdm Ildasolha

CELEBRATE SUCCESS

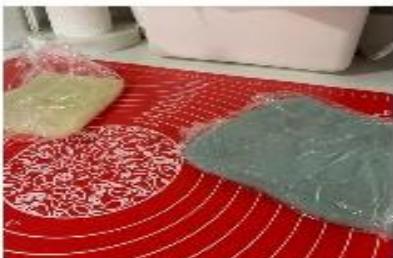

On 18 November, we closed the school year with our Celebrate Success ceremony. The students attended not only a school assembly, but also their individual class ceremony. During the school assembly, they were treated to performances by the choir, wushu and guzheng and learnt more about the C.L.A.M.P.S. framework. Parents were then invited to witness their child's respective class ceremony where each student was presented with his/ her individual award and words of encouragement written by their classmates. It was truly a fulfilling end to 2021 and we look forward to celebrating the students' successes next year.

Reported by Mdm Norliza

MID-AUTUMN FESTIVAL CELEBRATION

The students had participated in the making of Eco-Lantern and Snow Skin Mooncake do-it-yourself (DIY) activities during the school holiday, together with their family members. Creative stories were shared through a Padlet. The students also attended MT-Rex sharing session in Week 1 to learn more about this festival.

Reported by Ms Na Vievern

Mandai River Wonder Virtual Programme Panda Keeper Flows To School

On 13 and 14 October, our Primary 1 and Primary 2 students attended a virtual programme through Zoom to learn more about pandas and also how to care for them by the River Wonder facilitators.

The session was informative and engaging, with lots of interaction between the facilitators and our students. Our students gained more knowledge about pandas, their likes, dislikes and diet and also how our dedicated keepers keep them healthy.

Though it lasted only for an hour, it certainly opened our students' eyes on loving and caring for animals.

Reported by Mdm Stephanie Chua

WMS Makers Programme

"My brother helped me in making the puppets while I made the stage. We had so much fun doing it together. My parents were so proud of me."
Love Lee, P1 Gratitude

Students were tasked to create puppets and props based on the stories from the Big Books used in their English lessons.

The students took pride in sharing some of their puppets through their WMS Class Padlets while some showcased their projects to their teachers and friends in class.

We have some very creative and talented students indeed!

Reported by Mdm Norzila

Events Spotlight

Cultural Performance Exposure Scheme (CPES)

Our school participated in The Cultural Performance Exposure Scheme (CPES) - an initiative by the Committee to Promote Chinese Language Learning (CPCLL). We aimed to engage students in Chinese dramas and Chinese-Language related performances by local and overseas arts groups and provide opportunities for students to be exposed to the Chinese-Language related performances.

This year, the students taking Chinese Language as their Mother Tongue Language watched a puppet show, 'Mr Dong Guo', via Zoom. Students were entertained by the art of traditional and modern puppetry, coupled with modern theatrical elements in its presentation. Students also made shadow puppets based on the show.

"I think the puppet show was very interesting & fun because the artists used a variety of materials to make the costumes and the puppets, and they looked funny."

Chiao Xin Ning, Queenie, P2 Kindness

Reported by Ms Yvonne Loh

Physical Education Lessons

Students were engaged in some fun and interesting individual Physical Education activities whilst adhering to the SMMs. Despite the restrictions in place to ensure our students' safety, our PE teachers persevered to ensure that our students kept themselves fit and healthy.

"I truly enjoyed myself and had fun during the lessons even with the masks on."

Tong En Xi, Adele, P2 Responsibility

Reported by Mr Raime

MIDDLE PRIMARY (P3) Events Spotlight

Use of Information and Communications Technologies (ICT) in Chinese lessons

Each student was equipped with an iPad during the lesson, ensuring full engagement and participation during the activities. This student-centred approach also allowed students to learn at their own pace.

"It was fun and enjoyable. I hope we can have more lessons using iPad."

Bernice Lee, P3 Respect

Reported by: Mr Lim Kiat Siong

Mathematics Lessons

Simple mathematics manipulatives were introduced to help students perceive the mathematical concept of area and perimeter. Students used square tile papers to study the relationship between area and perimeter and length of each side. They observed that shapes with the same area could have different perimeters.

"I discovered that some figures have the same area but different perimeter. I enjoyed the lessons as they were fun and interesting."

Ong Yan Qing, P3 Sincerity

Reported by Mdm Sofie Chai

Every Child a Seed

Every Child a Seed is a yearly programme by NParks, which gives students the opportunity to grow their very own plant by providing them with a plant starter kit.

It complemented the Primary 3 science syllabus on the life cycle of a plant, plant parts and their functions. It also aimed to teach students the values of care and responsibility. NParks gave a token of appreciation in the form of a Microgreen Salad Kit for students who shared their greening journeys and experiences.

"I felt happy when I received this package. With this package, I could grow my very own spicy salad! When I was growing the salad, I had to water the plant daily. That taught me to be responsible."

Alyssa Choy, P3 Kindness

Reported by Mrs Rachel Goh

Light Me Up!

Students were engaged in various experiments at the Einstein Laboratory to investigate the properties of light and shadows during their science lessons. The students enjoyed experimenting in groups to discover how light behaves around us. They were also tasked to invent a toy which involved the application of the scientific concepts of light.

"It was interesting to learn about the properties of light and how a shadow could be cast during the lab hands-on activities."

Jayden Celestyn Lim, P4 Responsibility

Reported by Mdm Ildasolha

Mother Tongue (Chinese Language) Fortnight Activities

[Introduction to Ancient Chinese Finery and Chinese Classical Novels]

As part of the theme for this year's Mother Tongue (Chinese Language) Fortnight activities, the Mother Tongue department organised Zoom sessions on Ancient Chinese Finery and Chinese Classical Novels. Students focused on the value of Perseverance through the Chinese Classic novel, 'Journey to the West'. They also enjoyed an interesting shadow puppetry interaction with their teachers and peers.

Reported by Ms Yvonne Loh

Sports Education Programme

The students experienced archery under the Sports Education Programme. In line with the current SMMs, a virtual programme was conducted to provide students with an enriching and fun experience while developing their confidence and focus. They truly enjoyed themselves and looked forward to more fun and engaging sessions.

Reported by Ms Putri

SHHK Thinkers Programme

Singapore Hokkien Huay Kuan (SHHK) Thinkers Programme 2021 is a collaboration with AI Singapore (AISG) and Singapore Institute of Technology. This collaboration aimed to anchor deep capabilities in Artificial Intelligence (AI) and stimulate our students' interest in STEM and aspiration to be innovators.

This year, 32 students from Primary 5 level participated in this programme. They created prototypes to solve a problem that had risen due to Covid-19 situation so that everyone could live their lives confidently without fear.

Reported by Mdm Nooraina

"Thinkers Programme helped to build up courage, teamwork and imagination."
Chen Shuen, P5 Gratitude

"Thinkers Programme is a programme that allows me to use my imagination and creativity to think of new ideas for my prototype."

Mangrove Forest Virtual Field Trip

The students visited Sungei Buloh Wetland in a virtual field trip as part of their post-exam activities. The virtual learning experience was enhanced by the hybrid of pre-recorded videos in the virtual tour web page and in-class discussions facilitated by the science teachers. This allowed the students to have a multisensory experience of the outdoors in the safety of their own classrooms.

The students learnt about the unique structures and characteristics of the mangrove plants and the animals living in the habitat. These adaptations allowed them to survive in the water-logged forest.

"I learnt the importance of the mangrove forest and why Sungei Buloh is worth protecting. What I liked most was the part on the mudskippers where I learnt that they were fishes that live on land. I would like to see how they move if I have the opportunity to visit Sungei Buloh."

Emma Ng, P6 Kindness

"Sungei Buloh is where they protect plants, animals and their habitats. It was a pity since we did not get to see the plants and animals in real life. As an individual, I can look for sustainable food to protect our mangrove forests."

Jaden Seah, P6 Sincerity

Reported by Ms Wendy Chia

Food: To Waste Or Not To Waste?

The students participated in the Reduce Food Waste Programme as part of their Post-Exam science activities. The students were educated on the environmental consequences and solutions of general food wastage. They were given the opportunity to be involved in hands-on composting process, using the food waste composting machines available in our school.

Reported by Mdm Ildasolha

"I felt that this programme helped us understand more about our dream job and helped us to decide if we're suited for the job that we wanted."

Yew Zhi Yuan, P5 Sincerity

ECG FAIR

The Education and Career Guidance Fair aimed to equip students with the necessary knowledge, skills and values for their education and career plans. Primary 5 and Primary 6 students attended the fair, which comprised of an introduction to the SkillFuture website, afternoon sessions with selected speakers and SLS lessons. The Primary 6 students also attended talks by secondary schools. Through this fair, students gained awareness of the different pathways after primary school years and were inspired to work towards their interests and goals.

Reported by Mdm Elista Tan

Graduation Day

Our Primary 6 graduation ceremony celebrated the journey of the students as they looked back on what they had achieved and looked ahead to their next steps. Parents were invited to join in the ceremony and watch video montages created by the students via Zoom. The students rose to the occasion. They stood tall and were indeed our pride and joy – a testament of every teacher's effort in their NCPS journey.

Reported by Mrs Cindy Wong

SBS Transit kindness Month 2021

As part of the school's Values In Action efforts, the students contributed to the SBS Transit Kindness Month in November to spread kindness as well as show appreciation to our Bus Captains and Station Staff.

Our students crafted 'Thank You' notes as well as drawings. These notes were distributed to the staff of SBS Transit around Singapore.

Celebration of SUCCESS

SembCorp ezi-Recycling Competition

Our school participated in SembCorp ezi-Recycling Competition and received a Silver Award. Participating schools were graded based on the volume of recycling tonnage, creative design of educational posters and participation in recycling challenges. The challenges included creation of a video presentation and sorting of Type 1 and Type 2 plastics which were done by the Environmental Club members. We would like to thank all parents, students and staff for participating in the school's recycling programme.

School Green Awards 2021

The annual School Green Awards (SGA) is a voluntary environmental programme organised by the Singapore Environment Council and Starhub. It provided a platform for schools and students to develop and showcase their environmental efforts through customised activities. It also aimed to direct students and school staff to become responsible advocates of the environment.

This year, our school participated in this programme and received the top-tier award - the Vanda Miss Joaquim Award. This was a great recognition of the efforts put in by the staff, students and parents in caring for the Earth. The school wishes to express its gratitude to everyone for the contributions made and hopes to continue to improve in its efforts towards environmental sustainability.

Celebration of SUCCESS

Principal's Challenge Award

For this year, we have received many great ideas and suggestions from our students. Among all the submissions, these are the winners for the Most Innovative Award and the Most Implementable Award from Terms 1 to 3.

Term 1

Name: Jessie Seah, P4 Respect
Most Innovative

Name: Vijay Anand Shubhada, P5 Diligence
Most Implementable

Term 2

Name: Amelyn Lee Li Xin, P6 Diligence
Most Innovative

Name: Choo Yu Xuan, P5 Kindness
Most Implementable

Term 3

Name: Peng Peiyao, P6 Kindness
Most Innovative

Name: Quek Kai Teng, P5 Gratitude
Most Implementable

Celebration of SUCCESS

Malay Language National Spelling Bee Competition

On Saturday, 13 November, three of our Malay Language students took part in the Malay Language National Spelling Bee Competition. There were about 300 participants from about 30 primary schools in Singapore. We are pleased to announce that Aisyah Umairah, P3 Diligence, and Muhammad Aqil Mirza, P5 Diligence, had attained the 4th and 5th position respectively.

Reported by Mdm Nur Khadijah

NC75 Logo Design Competition

Nan Chiau High School invited students from both Secondary School and Primary School, staff and alumni to join in our 75th Anniversary Logo Design Competition. Students were tasked to design a logo which symbolises NC's journey through the years. The logo must reflect the theme: 爱我南侨 (Celebrating 75 Years of Belonging), incorporate Nan Chiau's colours (Red, Yellow and Blue) and be original, attractive and easily recognisable.

We are proud to announce that three of our students' designs were shortlisted. The students are Shayna Low Xin Yue, P2 Gratitude, Song Zilong Sherwyn, P4 Respect and Shanelle Low Zhi Yan, P6 Integrity. Each of them received a \$50 Popular voucher for their great effort.

Reported by Ms Yvonne Loh

SHHK Thinkers Programme

For this challenge, our NCPS Group 5 won the Best Presentation Award. They are Kira Kong Kar Yan, Yuan Xinwei, and Zhu Zhi He from P5 Gratitude.

Celebration of **SUCCESS!**

Gusto Art Competition

Teow Bao Yu, P4 Sincerity, took part in Gusto Art Competition and was awarded the 3rd prize.

Arts Development Award SOTA 2022

Lance Sim, P3 Diligence, received SOTA Arts Development Awards (ADA) 2022 for the Visual Arts.

10th National Chinese Calligraphy Competition

Congratulation to Sun Rongshuang, P6 Integrity, on receiving the 3rd Prize in the 10th National Chinese Calligraphy Competition organised by Futsing Association and Poi Ching School.

Celebration of **SUCCESS!**

Pei Hwa Virtual Hackathon 2021

A group of our Primary 6 students, Ang Yuan Zhe Caden, P6 Gratitude, Ng Say Wei, P6 Integrity, Eu Yong Le Memphis, P6 Respect and Ong Han Lin Max, P6 Kindness, participated in this competition and was awarded Best in Innovation Award.

This hackathon theme was 'Covid-ence: Confidently Living Life Fighting COVID-19'.

The group came out with a problem statement to find ways to avoid touching the door handles of the common toilet as there might be unknown bacteria on the door handles. They created a workable prototype of an automated toilet door that could open and close without the person touching the handle physically.

National School Games (NSG) Taekwondo & Women's Artistic Gymnastics

Our school was represented by our very own martial artist in this year's National School Games held at Mount Sinai. Despite facing many challenges, the boys did the school proud by clinching the top spots in their respective categories.

ANNOUNCEMENTS

TALENT SHOWCASE

Mr Chuan Peck Chew (Chinese Calligraphy)

My late father told me that we can tell one's character by his strokes. I have been practising my Chinese Calligraphy diligently since young. Back then, there was no computer and printer. Greeting cards, letters and notices were all handwritten.

I once taught Chinese Calligraphy during an Art lesson. It motivated me to see the students being captivated by Chinese Calligraphy and even showed great interest in the supposedly dull subject. Until now, the fire in my belly is still burning as I continue to conduct Chinese Calligraphy for students every Children's Day. Chinese Calligraphy certainly exudes beauty and calmness.

愛我南僑

Mr Cheng Zhong (*Model-making*)

I started model making 15 years ago as a hobby. I remembered how I would spend days and even months to complete one model. Even though I enjoy spending time building models, I had to put it on hold for some time as I was busy with school. However, when Covid-19 hit and the lockdown kicked in last December, I took the chance to rekindle my love for model-making.

Mrs Jessy Low (Cooking)

I love to eat. Hence, I love to cook. Cooking allows me to recreate dishes which I have tasted and which my family enjoys.

The most challenging dish I have attempted is braised duck. The texture of the duck cannot be too soft or too tough and the taste of the gravy has to be just right.

One dish that holds a special meaning to me is my late mother-in-law's 'Potato and Chicken Wing in gravy'. It is a dish well-liked by everyone in the family. She would always remember if each and every one of us liked her dish with rice or noodles. It showed the love she had for the family and we would always remember her fondly.
